Theory and Practice of Counseling and Psychotherapy, 8th Edition

Hailed by Jerome Frank as "the best book that exists on the subject, today and for the foreseeable future," Irvin D. Yalom's The Theory and Practice of Group Psychotherapy has long been the standard text in its field. Indeed, in a survey reported in the American Journal of Psychiatry, it was cited as one of the ten most influential psychiatry publications of the past decade, and it was one of the very few judged to be of "seminal or lasting value." In this completely revised and expanded fourth edition—updated to reflect the American Psychiatric Association's latest diagnostic manual, the DSM-IV—Dr. Yalom presents the most recent developments in the field, drawing on nearly a decade of new research as well as his own broad clinical wisdom and experience. This edition features new sections on combining individual and group therapy, the latest information about brief group therapy, and how to modify group work to deal with the newly emerging homogeneous focal groups (including survivor groups), as well as updated references and new clinical vignettes drawn from the author's recent practice. Throughout, Dr. Yalom has updated the style and content of the chapters, while retaining valid research and clinical observations. Illustrating the text are vivid cases from nearly two thousand group sessions that he has led over the past decade. The Theory and Practice of Group Psychotherapy is an informative text that is at once scholarly and lively. This new edition is the most up-to-date, incisive, and comprehensive text on group therapy available today.

authors keep their focus on the practical, the application of the theoretical and measurement concepts of counseling assessment, by presenting a unique new guide for administering, scoring, interpreting, and communicating assessment results. The conversational tone of writing will engage readers and put them at ease with the mathematical concepts and statistics involved. By focusing on the clinical examples and showing how each type of assessment may be utilized in various settings, the text provides an opportunity to view assessment as an integral part of the counseling process, rather than merely a specialization of counseling. Practical and modern, with the most current assessment information available upon publication, the text covers the most recent revisions of assessments, with modern theories on intelligence and ability testing addressed. This is the only assessment in counseling text on the market that introduces two case studies and follows them throughout, and covers accountability, as well. Section 4 describes post-modern therapies and examines the relatively new approaches of narrative therapy, solution-focused brief therapy, and relational cultural therapy, a form of feminist therapy. The final chapter explores a number of more recent and emerging theories.
